

# **About your data**

## **Analytics**

Formatic uses Google's Firebase Performance Monitoring, Crashlytics, and Analytics to log and store generic app usage data including, but not limited to what pages are viewed most or if your app crashes. The Firebase privacy policy can be found [here](#).

## **Data Storage**

While signed in with an iCloud account, data is synced through Apple's CloudKit private database service. If you are not signed into an iCloud account or turn iCloud sync off in settings, data will persist on your device using Apple's Core Data service until deleted. The CloudKit privacy policy can be found [here](#).

## **Permissions**

Location, camera, and photo library permissions may be requested, but nothing is processed from that information and users have the option to deny these requests.

We understand privacy is very important and want to respect that. Analytics, data storage, and permissions have all been added with an end goal of enhancing user experience. If any questions arise, please contact [eli@elihartnett.com](mailto:eli@elihartnett.com)

Privacy policy last updated November 18, 2022.
